Learners extend learning as they pursue topics of personal interest by reading, writing, and tinkering.

Learners work in local and global communities to identify, investigate, and solve authentic problems.

Learners construct new knowledge and solutions that are personally relevant using inquiry and design processes.

Learners identify their own potential by accepting feedback and self-assessing.

Learners have a growth mindset and develop the habit of lifelong learning.

- Create physical and virtual spaces that invite conversation and wondering.
- Model and foster curiosity and persistence.
- Provide time for students to wonder as they explore content and resources.
- Ensure learner voice and choice, reflection, and authentic learning opportunities.
